

Mosquito Solutions!

Tired of mosquitoes ruining your time outside?

These pet and family safe options containing all natural ingredients, so they can be used in an organic garden setting.

Mosquito Bits - A biological mosquito control which releases a strain of bacteria known as *Bacillus thuringiensis* i. (Bt I), which is harmless to pets, birds or aquatic life but will kill mosquito larvae. Sprinkle into areas that stay moist, such as under a dripping faucet, in rain gutters, beneath shrubs, or where you have the smallest amount of standing water, to stop them from becoming adults.

Mosquito Dunks uses the same active ingredient, in a solid form that can be tied down. Use for ponds, creeks, water features, or bird baths.

Cedarcide - Broadcast these red cedar granules with added cedar oil by hand or with a spreader for an organic way to repel mosquitoes, flies and gnats throughout your lawn and garden. You'll love the cedar scent!

Eco Smart Products - These natural products with herb oils work well, smell good, and are safe: **Mosquito Fogger** is a quick and convenient spray; **Mosquito & Tick Control** is great before garden gatherings; and the **Insect Repellent** has the same oils and can be applied to the skin.

Skeeter Screen Products – The **Patio Egg, Candle,** and **Reed Diffusers** are wonderful for use in entertaining areas where guests gather in the garden.

Bug Bouncer -all natural and DEET-free, these oils for personal use repel over 100 different insects, and are concentrated, portable personal protection.

Insect Repellent Towelettes - a handy, easy-to-use method of applying Geraniol DEET-free insect repellent. Contains 8-by-8-inch pretreated insect repellent towelettes. Perfect travel size fits conveniently in a bag, glove box or purse. Share with the whole family.

Consult a Garden Advisor if you have questions on these products or your mosquito situation.
