IPM • POP UP Class: Cool Season **Containers** by Carolyn Kennedy, NHG Garden Advisor

FRI-SUN, OCT 12-14 • Orchid **Show** Presented by the Orchid Society. Details at www.nhg.com

#### SAT, OCT 20 • FAIRY GARDEN CONTEST

Enter by 12:30! Winners announced at the Ipm program. Use small furniture, toys, colorful pebbles and plants to create your own fairy world. Winners based on creativity, uniqueness, and plant usage.

12:40PM • Fairy Lore Story Time drop off your garden, and stay for a story read by NHG Staff about fairies. By Robin Carlton, NHG Garden Advisor

**IPM** • Create a Fairy Garden or Terrarium Simple step-by-step instructions to create your own. Plus, vote on your favorite entry! By Robin Carlton, NHG Garden Advisor

### **Magic Fairy Gardens**

by Robin Carlton, NHG Garden Advisor Celtic legend has it that Fairies are so curious about humans they hide themselves among the flora found in human gardens so they can observe us. Plant a Fairy Garden, and keep an eye out for signs that they have visited.

Fairy Gardens can be created almost anywhere outdoors, as well as in boxes and pottery. Once you have chosen a spot. create a miniature landscape. A rolling "hill" covered in thyme, a germander 'tree', and small 'bushes' of ferns that come in 2 inch pots are just a few of the many plants that are perfect for Fairy gardens. We have a large selection of herbs, terrarium plants and ground covers in-stock year round! The key is for everything to be on a small scale. We have a great selection of everything from benches to bicycles - all in fairy size! Be as creative as you like and re-purpose glass mulch, reindeer moss, and decorative stones. If you watch your fairy garden closely on crisp fall nights, you might catch a glimpse of these magical creatures dancing with the fireflies!

Enter our 1st annual Fairy Garden Contest, **October 20th**. You'll find everything you need at NORTH HAVEN GARDENS including plants, furniture, glass pebbles, and more! Details at www.nhg.com

## Tough, Irresistible Iris

by Robin Carlton, NHG Garden Advisor
Iris are flowers of unique beauty and easy to
maintain. Thanks to enthusiastic breeders,
there's a rainbow of Iris with something on the
spectrum for every gardener's style. If you prefer
elegant, understated blooms, try the mauve dwarf
Iris 'Concertina'. For a more classic garden,
there are sky blue 'Aldo Ratti', ruffled violet
'Raspberry Jam', and blue violet 'Fast
Forward'. Bold, modern choices include
tangerine dream 'Pele', bi-color yellow and
violet 'Being Busy', and rust red and violet
bi-color 'Flirting Again'. We will have a huge
Iris selection this fall!

## We'll Do the Chillin'

Did you know NORTH HAVEN GARDENS is the only nursery in town that will store and pre-chill your tulip bulbs? Select bulbs early and leave them with us until planting time. Storage at the right temperature, about 45°F, for 60 to 70 days is necessary for your tulips, hyacinth and crocus. When you purchase \$100 worth of bulbs, we'll store them for you at just the right temperature for just the right time. We'll call you at the beginning of December to let you know when it's time to plant.

# Dig.Drop.Done.

BULBS

Really. There is no fourth step.

# Beautiful Blooming Bulbs Begin with Proper Planting

by Christine Hensley, NHG Plant Buyer, BS

- 1. Choose a sunny location to plant your bulbs in the ground or in containers.
- 2. Amend your bed or pot with compost and expanded shale to increase drainage and microbial activity.
- 3. Plant bulbs 2-3 times as deep as they are tall. Large daffodils and tulips are planted 6-8" deep. Smaller daffodils and crocus are planted about 2"deep. See our bulb spacing page for directions on how to plant pansies/violas on top of bulbs. http://nhg.com/pdf/bulbplantingdepthmath.pdf
- 4. Dig a large hole and place a layer of of 12-24 bulbs for a more natural clumping effect. Most bulbs, such as daffodils, hyacinths and tulips, prefer planting bud side up. Cover with soil and fertilize with **NHG Organic Bulb Food**.
- 5. Water the bulbs after planting, and apply a layer of mulch to help retail soil moisture and suppress weeds. Keep soil lightly moist but not wet throughout the blooming and growing season.

# Creative Options for Spring Bulb Plantings

by Carolyn Hestand Kennedy, NHG Garden Advisor
Create a container using spring blooming tulips or daffodils over planted with cool season violas and pansies. Better yet, mix in something unusual such as bicolor linaria, peachy diascia or stunning blue lobelia. Start with 3"-4" of soil such as **NHG Premium Organic Potting Soil** in a pretty container. Depending on its size, place 10-20 bulbs close together with points up. Add **NHG Organic Bulb Food**. Fill the rest of the pot with soil and plant annuals as usual. In spring, the beautiful bulbs will gradually work their way up through the plants on top and come in to bloom for a gorgeous effect.

## **Planting Time**

Plant tulips, hyacinth and other spring flowering bulbs between Thanksgiving and the end of December, when soil temperatures reach 45-50°F. Daffodils, however, can be planted any time after October 1st and through mid-January.

# **Bulb Project Boosters!**

The right tools, fertilizers, and soil amendments will make planting simpler and blooms more beautiful! Bulb trowel, **NHG Organic Bulb Food**, and Bonemeal.

## Fall is the New Spring: Staff Picks for Fall

Fall is the very best time of year to plant all trees, shrubs, groundcovers and perennials! The cooling temperatures and rainfall make for an easy transition for new plantings. Most importantly, plants have about 9 mos. to put down roots before they have to go through a hot Texas summer. This makes a big difference in getting your new plants established during their first few years in the ground. As a bonus, you'll spend less time and water establishing new plants. Come see our great fall selection of shade trees, specimen shrubs, roses, perennials and cool-season color! Here are some of our staff favorites...

#### **RUSTY ALLEN**, NHG Garden Advisor (GA)

**Shantung Maple 'Fire Dragon'** • Great for smaller yards. 25' tall x 30' wide. Beautifully shaped leaves and vibrant fall color. Grows best in well-drained soil. Well adapted for Texas.

**Sedum 'Autumn Joy'** • Perennial. Wonderful pink flowers mature to copper in fall. Plant in well-drained soil in sun to part sun. Tolerates some drought once established. Attracts butterflies! 2' tall and wide.

**Hellebore (Lenten Rose)** • Evergreen perennial. Great in shade, and is one of the first to bloom in late winter/early spring. Flowers range from pink and purple to white and cream. Grows 12"– 18" high. Combine with flowering bulbs such as crocus and grape hyacinth to bloom in late winter.

**Japanese Yew, Taxus 'Hicksii' •** Evergreen shrub. Tolerates a wide variety of soils, but performs best with good drainage. Finely textured small leaves. 9-12' tall, 6-10' wide. Part shade to shade. Keep soil moist, not soggy.

#### LAURA FICK, NHG Asst. Manager

**Abelia 'Kaleidoscope'** • Compact 2-3' high and 3-4' wide. Variegated foliage that changes from orange and green in fall, to a bright green center with yellow outer edge in spring and summer. In late summer, white tubular flowers appear, attracting pollinators. Sun to part shade. Moist well-drained soils.

**Yaupon Holly 'Micron'** • Tolerant of most soils. Drought tolerant once established. This shrub is perfect for people who do not like to prune and want an evergreen mounding shrub that only gets 20-30" tall, with a width of 3'. Sun to part shade. Great in pottery!

#### KYLE LEGGIERO, NHG GA

**Pink Muhly Grass** • Native grass. Grows well in full sun or light shade. 2-3' tall and wide. Dry soils are no problem! Flowers a beautiful pink seed head in fall. Breath-taking in mass plantings.

**Heuchera** • Tall spikes of flowers above a mounding form in spring. Best known for their colorful foliage and love of shade. Varieties such as **'Black Out'**, **'Georgia Peach'** and **'Gold Zebra'** pop with color!

#### KAY NELSON, NHG Garden Coach, TCNP

**Aster o. 'October Skies'** • Fall blooming perennial. Lavender-blue with yellow centers. Plant in full sun and moist, well-drained soil. 24" to 30" tall. Shear to 12"-15" in late May to keep more compact.

**Pennisetum 'Hameln'** • A hardy perennial grass with narrow, dark-green leaves and creamy tan plumes in late summer and fall. Quick grower! 2-3' tall in full sun and well-drained soil.

# NOW is the TIME...

#### SEPTEMBER

- O Select and purchase daffodils, tulips, hyacinths, and specialty bulbs mid-September for the best selection.
- O Plant roses now! Many varieties bloom heavily this time of year. Fertilize with NHG Organic Rose Food.
- O Fertilize lawns, trees, roses and shrubs at the beginning of September. Fertilize with NHG Organic 7-2-2. For Japanese maples, hydrangeas, peonies and other heavy acid-feeders, apply Espoma Organic Holly-tone.
- O Add compost to veggie beds and mulch all beds, shrubs and trees in preparation for fall.

#### OCTOBER

- O Didn't purchase spring blooming bulbs in September? Select this month! Don't forget – we'll store your tulip bulbs at the proper temperature until planting time.
- O Purchase frost cloth to be prepared for unexpected cold weather.
  Having extra on-hand never hurts!
- O Fertilize herbs and veggies with NHG Organic Herb & Veggie Food!
- O Fall is the perfect time to plant (and transplant) trees and shrubs!

  Cooler temperatures and increased rainfall make for easier maintenance.
- O Begin to harvest fall tomatoes you planted in June and July.

### Plant Your Fall Veggie Garden Now!

All these vegetables will perform well as the temperatures drop, many will tolerate a light or hard freeze. You can replant this same set of crops in late January or February for an early spring garden before the heat arrives!

**Transplants**: broccoli, cauliflower, Brussels sprouts, cabbage, kale, and collards, dill, cilantro, and fennel.

**From seed**: Fava beans, carrots, beets, turnips, spinach, Swiss chard, cilantro, lettuce, radish, mustard, and peas.
