

Every Blooming Thing

November - December 2016

Find a Closer Connection to Nature

We're your local destination for the finest winter greenery, plants and décor inspired by the natural world. **Here are three of our picks this season:**

These delightful, **detailed metal silhouettes** can ornament garden or home. Made in Washington State by husband and wife artists Jay & Madeleine Crowdus, who in 2011, had a vision to turn their love of birds and other woodland inhabitants into these rustic metal creations. We loved them at first sight! **Handmade indoor/outdoor chimes** created and assembled in India. Crafted of copper and hand-blown glass beads, each chime and mobile is individually tested to ensure the bells give off a calming, melodic sound. With colors and shapes based on everything from old photos to memorable moments, Preston Hollow resident **Alyce Glazer Levy's** works begin with a single piece of wood with its own unique rings and markings that have a story to tell. Each piece is completely unique and one of a kind.

See these and more throughout the season in the store and the gallery at NHG.

Easy Ways to Bring Your Garden Indoors This Season

Save time and money with these decorating tips

Paula Spletter, NHG's creative director extraordinaire (and long-tenured Dallas County Master Gardener) loves color and texture, but doesn't rely solely on

blossoms to get them for her seasonal decor. Her favorite? Super-hip succulents, of which she keeps a good supply growing in her garden year-round.

While gourds and pumpkins are abundant during the fall season, Paula offers a quick tip for a simple centerpiece that requires no carving. You'll need a small handful of moss (sheet moss is ideal) and a variety of succulent cuttings, preferably snipped and allowed to dry for a day or two before use. Affix the moss to the top of the pumpkin with a few dots of hot glue; allow to dry. Arrange the succulent cuttings on top of the moss; be sure to include a variety of colors and forms as well as small and large cuttings to create a nice composition. Affix each with a drop of hot glue. For larger pumpkins, Paula often finishes her creation with dried tips of branches, small pinecones, or even nuts. These mini-pumpkins make fabulous place card holders for a Thanksgiving table, too! Paula considers them a sort of long-term floral arrangement, noting that they'll last about one to two months indoors. Paula's blending of succulents with other textures also extends to holiday plating.

Here, she uses a simple white cake plate and adds a nest of green Spanish moss (*Tillandsia usneoides*). With snips of garden greenery—here, Camellia, Boxwood, Yaupon Holly, Junipers, and Magnolia—she layers the succulents to create a unique composition, finishing it with a bright green apple and a few dried almonds in the shell. It's a fresh, low-cost way to bring the garden indoors this season, and perfect for the holiday table. Paula's final tip? Up the 'heirloom' factor by using a cherished vintage dish or add interest with collectibles or even costume jewelry.

See Paula live in person during our Holiday Art & Gift Market

on December 3rd, where she'll be offering demos, tips and tricks for bringing your own garden inside this season.
